

## ELECTRONIC ATTITUDE DIRECTION INDICATOR

The EADI has one basic display mode, which shows:

- Aeroplane attitude
- Flight Director commands
- Various types of airspeed
- ILS
- Radio Altimeter

Across the top of the EADI, autothrottle and autopilot annunciators are provided when the autopilot is either armed or engaged. An inclinometer (slip indicator) at the bottom of the EADI provides turn and bank information.

### EADI GENERAL

The EADI presents conventional EADI displays for:

- Attitude
  - Pitch
  - Roll
- Flight Director Commands
- Localiser and Glideslope deviation
