Nothing in this text supersedes any operational documents or procedures issued by the Federal Aviation Administration (FAA), the aircraft and avionics manufacturers, any aircraft's Pilot Operating Handbook (POH) or approved flight manual (AFM). Don't for one second think that the generic recommendations found in this book override the common sense recommendations of your flight school or flight instructor for a specific airplane or situation or a given set of circumstances.

The author has made every effort in the preparation of this book to ensure the accuracy of the information. However, the information is sold without warranty either expressed or implied. Neither the author nor the publisher will be liable for any damages caused or alleged to be caused directly, indirectly, incidentally or consequentially by the information in this book.

The opinions in this book are solely those of the author and not the publisher.

Don't even think about using any performance chart in this book for performance computations in your airplane. Find a performance chart appropriate for your airplane and use that one. All of the charts, graphs and tables in this book are for training purposes only.

Acknowledgments.....iv
Dedication.....v
About the Author.....vi
Introduction.....vii
Message to Instructors.....viii
Updating Your Book.....xi
Book Prerequisites.....x

1 Chapter One
 Pages 1-1 through 1-38
Let's Go Flying
Basic Piloting Skills

2 Chapter Two -
 Pages 2-1 through 2-38
Flying Straight And Level And Turning

3 Chapter Three
 Pages 3-1 through 3-26
Climbs and Descents
Understanding the Basics Of Flight

4 Chapter Four
 Pages 4-1 through 4-26
Slow Flight Delight
How and Why We Fly Slow

5 Chapter Five
 Pages 5-1 through 5-58
Stalls and Spins
The Ups, Downs and Arounds

6 Chapter Six
 Pages 6-1 through 6-40
Takeoffs and Climbs

7 Chapter Seven
 Pages 7-1 through 7-38
Ground Reference Maneuvers

8 Chapter Eight
 Pages 8-1 through 8-26
The Airport Traffic Pattern
The Lowdown On Gettin' Down

9 Chapter Nine
 Pages 9-1 through 9-30
Approaching to Land
Gettin' Low, Gettin' Down

10 Chapter Ten
 Pages 10-1 through 10-36
The Roundout and Flare
You Have the Nod To Hit the Sod

11 Chapter Eleven
 Pages 11-1 through 11-22
Crosswinds and Slips
Flying Sideways Is Fun

12 Chapter Twelve
 Pages 12-1 through 12-28
Advanced Landing Skills
Not All Runways Are Created Equal

13 Chapter Thirteen
 Pages 13-1 through 13-34
Advanced Maneuvers
Tools to Help You Become Proficient

14 Chapter Fourteen
 Pages 14-1 through 14-28
Night Flying
Taming the Dark Side

Appendix-1.....15-1 through 15-12
Editors.....15-13 through 15-14
Aviation Speakers Bureau.....15-14

Microsoft Inc. and their Microsoft Flight Simulator software
 (for many of the flight sim screen shots used in this book)

The New Piper Aircraft Corporation. Charts and graphs provided by Piper are to be used for information purposes only. The Pilot's Operating Handbook is the only true source of information.

The Cessna Aircraft Company. Cessna authorized the use of their materials with the understanding that they are to be used for training purposes only, not the actual operation of an aircraft.

Clipart from the following companies:

3G Graphics, Archive Arts, BBL Typographic, Cartesia Software, Image Club Graphics Inc., Management Graphics Ltd., One Mile Up Inc., Studio Piazza Xilo Inc., Techpool Studios Inc., Totem Graphics Inc., TNT Designs, SmartPics.

Note: If I missed crediting or acknowledging any contributor to this book, please forgive me. I promise to give you credit and apologize again (big time!) as soon as you let me know.

DEDICATION

If you're lucky enough to have someone in your life that can give you an honest appraisal of your work, then you're really lucky.

I'm lucky.

For the past 25 years I've been fortunate enough to have one editor for all my book projects. He's a master wordsmith and one of the wisest men I know. He's also the one responsible for keeping my grammatical sails trimmed and my educational course true.

Mr. Brian Weiss of *WORD'SWORTH* has always told me the truth about what works and what doesn't work in print. Were it not for his wise counsel I'm not sure that the products I've produced would have been so well received by the aviation community.

I consider this book to be one of the most important I've written and there is no one I would prefer to dedicate this book to more than my editor and dear friend, Brian Weiss.
